# Why Smartphones?

# QUESTION:

## HOW MANY SMARTPHONES SHIPPED SO FAR IN 2015 WORLDWIDE?

# ~1.12 Billion Smartphones\*

WW Statistics, ~340M devices per quarter, 13.8% growth Y/Y

# QUESTION:

## HOW MANY BABIES BORN SO FAR IN 2015 WORLDWIDE?

~104 Million Babies\*

2015 world population growth: 61M

“New People” to “New Smartphones” ratio:

1:11

# SMARTPHONES – THE ULTIMATE INTELLIGENCE GATHERING TOOLS

Extremely rich data environment

- **Voice Communication**
  - Real time, History
- **Text Communication**
  - eMail, SMS, Instant messaging
- **Files**
  - Attachments, Cloud storage, Generated on device, Application related data
- **Online Accounts**
  - Access, Data, Account information
- **Multi dimensional social connection map**
  - Phone numbers, eMail addresses, Social networks, Groups and categories, Communication patterns

# SMARTPHONES – THE ULTIMATE INTELLIGENCE GATHERING TOOLS

## Powerful surveillance tool

- **Microphone**
  - Room tap, Live environment feed
- **Camera**
  - Video, Environment snapshots
- **GPS**
  - Highly accurate location tracking, always carried in subject's pocket
- **Network**
  - Always online and connected, Simplifies exfiltration, Bi-directional communication
- **Storage**
  - Large, Exfiltration on demand

# SMARTPHONE USER'S EXTREME BEHAVIOR CHARACTERISTICS

On average smartphone users have **27 apps** on their phones

On average users spend **81 minutes daily** on mobile apps

**66%** check their favourite app at least **once** a day

**44%** check their favourite app **several times** a day

**Smartphone users are “super users” especially when it comes to apps**

# COMMON INTELLIGENCE GATHERING TECHNIQUES

Interception of Voice and  
Data Communication

Physical Extraction  
of Data

Trojan Attacks

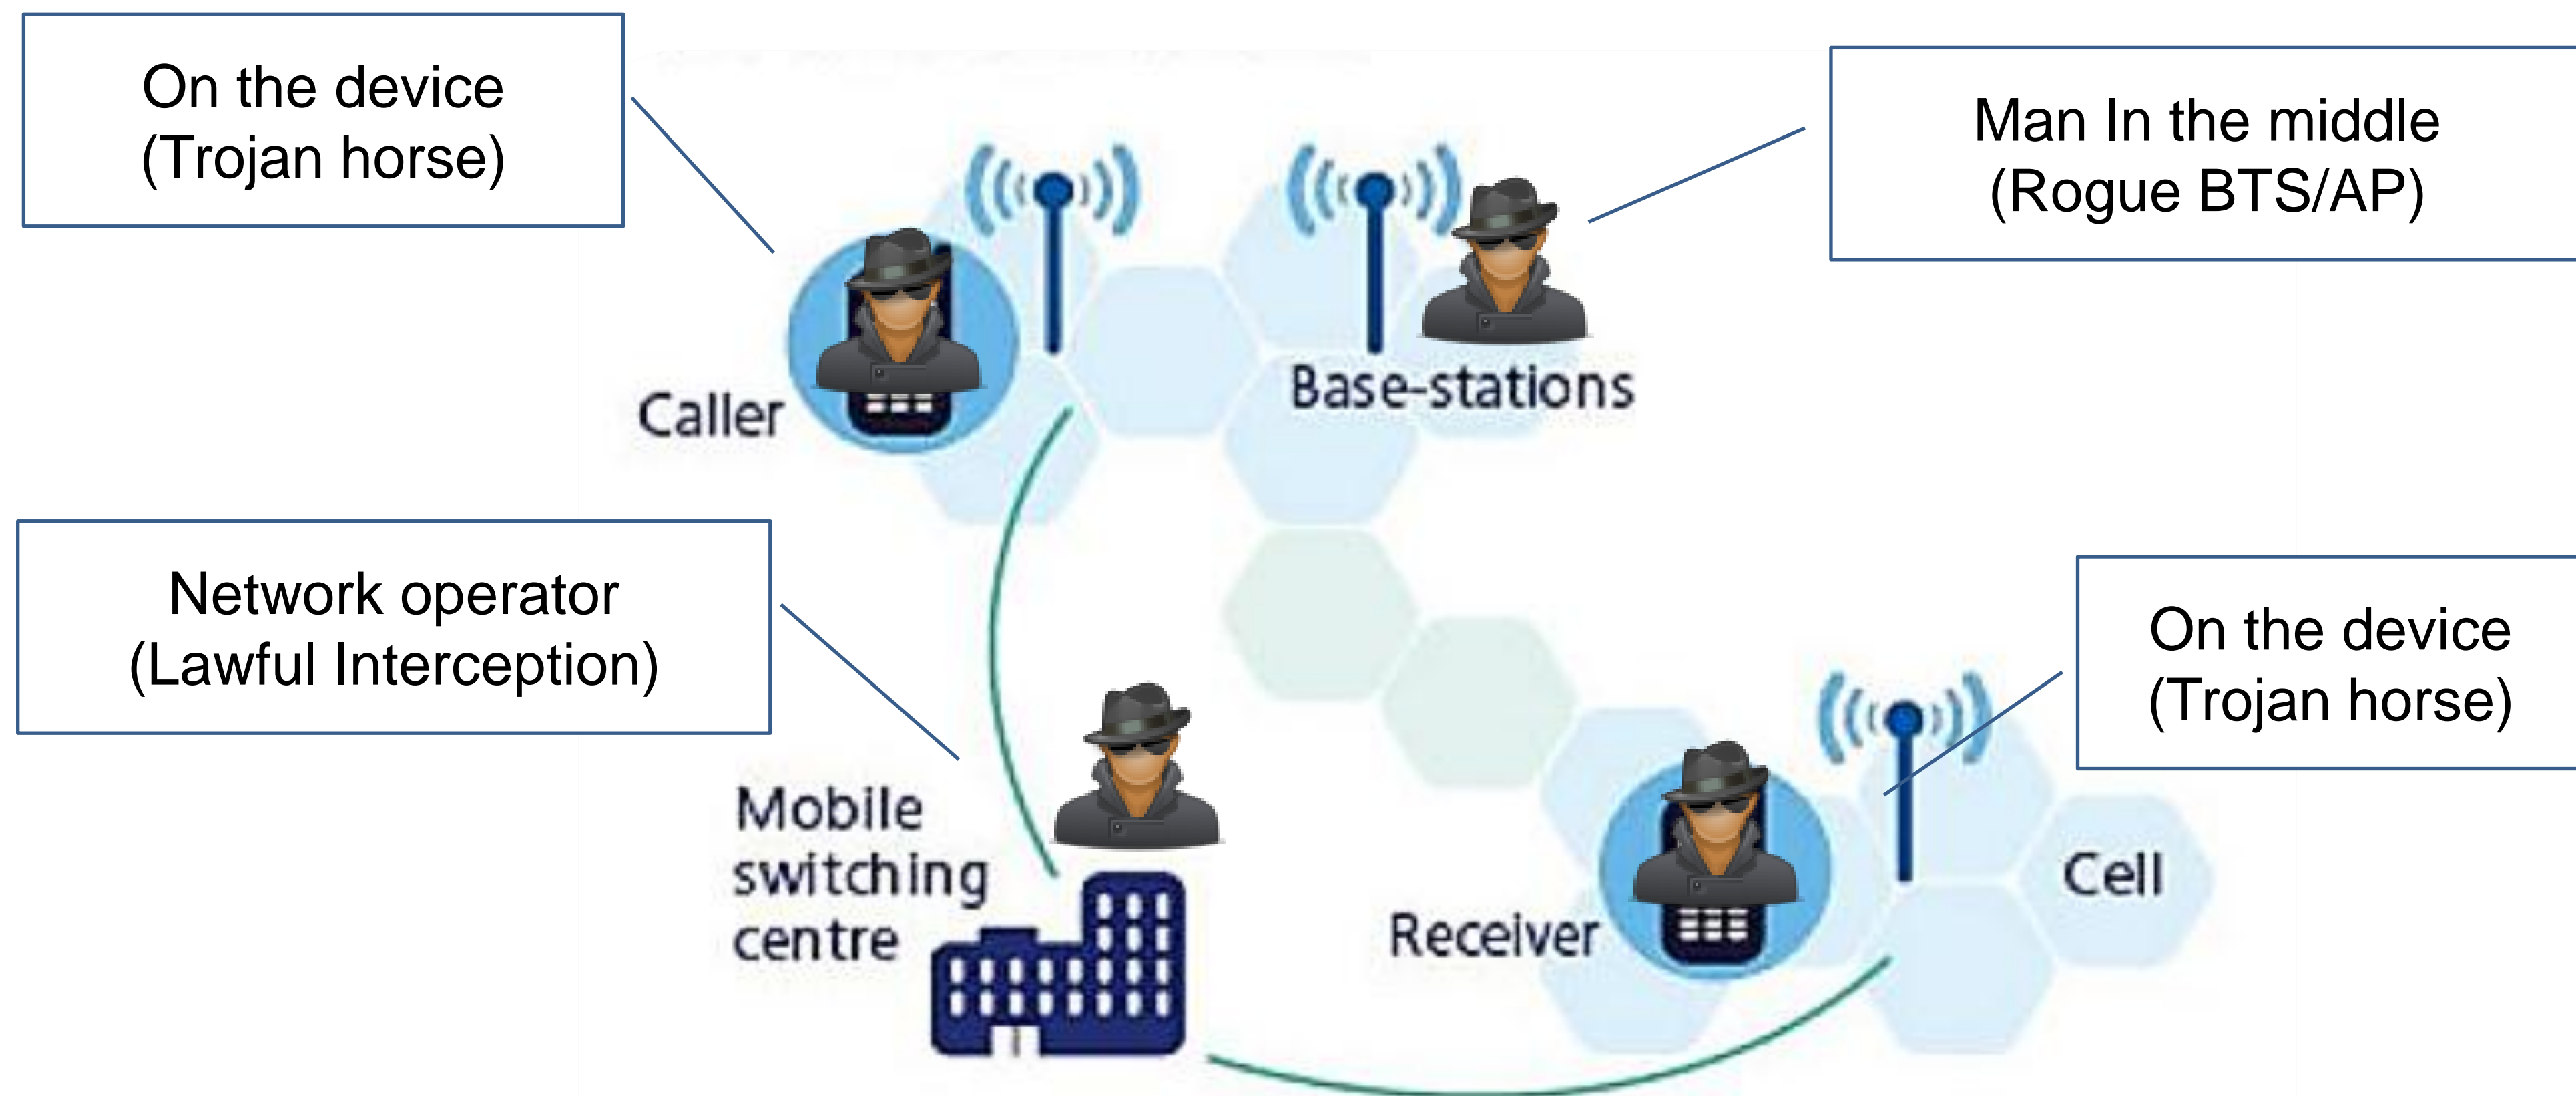

Location tracking

Exploiting applications'  
permission structure

Exploiting human behavior

# COMMUNICATION INTERCEPTION

Remote Control System

Operations System Monitor **1**

# Best Defense Approach

# ADJUST TO NEW THREATS

Any solution out there.....

- Need not to rely on the user
  - Too careless, extreme behavior characteristics
  - No security awareness
  - Human factor is the weakest link
- Need to cover **ALL** threats and intelligence gathering techniques
  - Techniques are used in parallel
- Provide usability and functionality
  - Maintain the “Smart” in Smartphone
  - Mobile security by restriction is failing
  - Provide good balance between security and functionality

# MULTI-LAYERED PROTECTION APPROACH

中国互联网安全大会
